RE: Status of Reeds Mesa Leases (State of Utah Trust Lands Administration), Emery County, UT

Dear Mr. Baker,

Some time ago we talked over the phone about the status of what I understood to be an old permit application on the Reeds Mesa (Moore Road) Trust Lands gypsum lease. This letter is to advise you, per your recommendation, of the status of those lands with respect to mining development.

The United States Gypsum Company has the following parcels under gypsum lease with the State Trust Lands Administration:

869.32 acres in Sec 2 T23S R8E, Emery County 150075
640.00 acres in Sec 36 T22S R8E, Emery County 150092

Mr. Kyle Morris was the quarry manager at USG's Sigurd, UT operations in 2003. At about that time he initiated correspondence to develop a 5-acre gypsum quarry disturbance on these parcels. Mr. Morris left the company a short time after that, and the process was not taken to completion.

USG has caused no disturbances on these leased parcels, and will not develop a quarry there in the near future. Therefore, we consider Mr. Morris' applications defunct. We do, however, desire to keep the lease active should we want to exercise our leased rights for future mineral development.

Thanks for your concern in this matter, and feel free to call my anytime.

Respectfully

Joseph E. Crawford
